

Who Is Sound Generations?

Since 1967, Sound Generations has established itself as the leading non profit organization, serving older adults and adults with disabilities in King County. Annually we support over 50,000 individuals on their aging journey through community connections and accessible services.

What does Sound Generations Do?

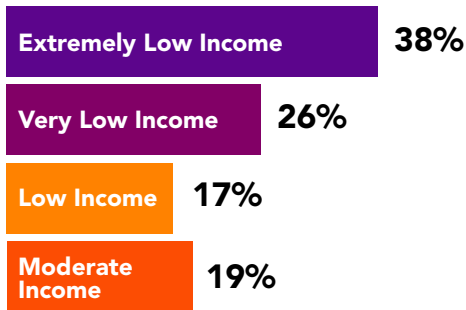

Sound Generations offers twelve programs through multiple community partner sites, including five senior centers. We are constantly expanding our awareness of what the needs of our constituents are through our focus on Food Security, Transportation, Health & Wellness, and Assistance Services. We pride ourselves on including and understanding the needs of our under-resourced and marginalized communities.

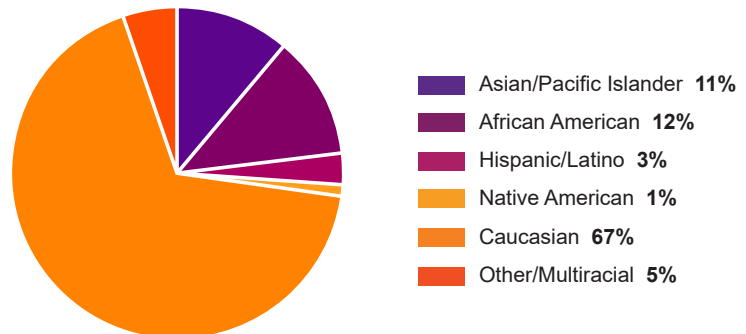

In King County, older adults will represent almost one-quarter of the adult population by 2025. One in four 65 year olds will live past the age of 90. While we celebrate the increased life span, maintaining health while aging comes with a price.
